Training Course for HKTIC’s Professional Certification Scheme for Testing Personnel

Target: Applicants who seek to be qualified as “Certified Testing Professionals” (CTP)
Duration: 1.5 hours
Language: Conducting in Cantonese, presentation materials in English

Outline

I. Introduction

II. “Integrity Tests”
- Using various scenarios to test participants’ ethical fitness to handle common malpractices at workplace and explain why it is important to provide guidance to subordinates facing ethical dilemmas.

III. Corruption Prone Areas in Testing Laboratories
- Illustrating common loopholes of corruption and malpractices which might be faced by testing professionals and their subordinates with reference to the following areas:
  - Solicitation / acceptance of advantage
  - Offering of advantage
  - Acceptance of entertainment
  - Other areas of concern

IV. Laws and Professional Integrity
- To set a role model for subordinates, testing professionals must ensure that their conduct is lawful, compliant and justifiable:
  
a) Lawful:
  - ICAC cases will be used to explain the spirit and relevant provisions of the “Prevention of Bribery Ordinance”.
b) **Compliant:**
   - The importance of professional integrity and impartiality which are basic accreditation, certification and professional requirements will be exemplified.

c) **Justifiable:**
   - How to determine whether an act is justifiable and in line with public expectation.

V. **The Key to Integrity Management**
   - Major factors leading to corruption problems
   - Supervisory Accountability and Integrity Management
     - An approach of risk analysis and risk management

VI. **ICAC Services**

VII. **Question-and-answer Session**

- End -
